

SUSTAINABLE PACKAGING

Air-pillow films with
renewable raw materials.

AIRWORKS

our passion is product protection

PROVIDE A CUSHION FOR SUSTAINABILITY.

With our new BioLine, air-pillow film becomes a sustainable packaging artist. The film with renewable raw materials combines resource-saving environmental friendliness with the well-known benefits of Airworks air-pillow films: low weight and low shipping costs with reliable protection and high load capacity.

Of course, the new BioLine can be processed on all CIRRUS machines.

Are you sustainably intrigued?
